

iKey 3000 Replacement Promotion IDp 1000

A.E.T. Europe B.V. (AET) is a leading global supplier of strong authentication solutions. We would like to inform you about the latest developments of our software **SafeSign Identity Client (IC)** integrated with USB tokens supporting the use of digital certificates.

SafeSign IC is the leading smart card / USB Token middleware software available today. It has been included in the past with the iKey 3000 Token and has been sold to many customers all around the world by Rainbow/SafeNet as well as Giesecke & Devrient being the supplier of the smart card chip integrated on the iKey 3000 (see also the iKey 3000 brochure).

As the iKey 3000 has been discontinued, AET likes to offer iKey end users as well as resellers / distributors the opportunity to continue to use, supply and support USB tokens leveraging the SafeSign IC software. A similar USB token supported by SafeSign IC is the **IDp 1000**. It supports a couple of unique features compared to other USB tokens.

SafeSign IC offers you:

Multiple OS support

Support for Windows - including Vista (32 bits)-, Linux and Mac OS X.

Multiple language support

SafeSign IC supports multiple languages including Japanese, French, English and Chinese.

Advantages of IDp 1000

CCID compatible

The IDp 1000 USB token supports CCID. This ensures correct operation on all platforms, as well as independence of (additional) reader drivers, as the operating system can directly access the token. This makes problems caused by the lack of drivers for a particular platform something of the past.

Java Card 2.2 smart card operating system on-board

Powerful JCOP Java Card operating system, offering RSA 2048 bit key support.

72 Kbyte of EEPROM

Largest amount of EEPROM available on a USB token.

Certification

Certified according to Common Criteria.

Evaluation kits available: An IDp 1000 USB token for testing purposes can be provided on request.

Promotion pricing: We are able to offer special bundle prices for our products, please contact an AET Certified Solution Partner or contact us at +31 (0)26 3653350, sales@aeteurope.nl or visit our website.
